New LoRa® Sub-GHz Radio Transceivers

Offering Best In Class Range in Any RF Environment For Reliable, Low Data Rate and Low Power Communications

SX1261, SX1262 & SX1268 PRODUCTS

These devices are designed for multi-year battery life with just 4.6 mA of active receive current consumption. With support for LoRa modulation for LPWAN use cases and (G)FSK modulation for legacy use cases, the devices are compatible with existing LoRaWAN™ networks and can support proprietary protocols.

The radio is suitable for systems targeting compliance with radio regulations including, but not limited to, ETSI EN 300 220, FCC CFR 47 Part 15, China regulatory requirements, and the Japanese ARIB T-108. Continuous frequency coverage from 150 MHz to 960 MHz allows the support of all major sub-GHz ISM bands around the world.
