www.semtech.com
Semtech designs the industry’s most innovative optical, analog and mixed-signal semiconductor solutions to serve the rising global demand for high-speed data transmission products.

Semtech is an active contributor to networking standards development and has shipped over a billion optical ICs. This combination of real-world experience and industry leadership enables us to deliver best-in-class solutions for our customers’ designs.

Semtech also offers one of the industry’s most comprehensive portfolios of optical transceiver IC products ranging from 100Mbps to over 100Gbps, supporting key industry standards such as Fibre Channel, InfiniBand®, Ethernet, CPRI, PON, SONET, and PCI Express®. Semtech is also investing in leading-edge technologies to enable communication systems at 400Gbps and beyond.

For our optical component and module customers, this highly differentiated set of products provides a unique roadmap that improves performance and reliability, while simplifying design, lowering costs and speeding time-to-market.

For systems designers and manufacturers working on the next generation of high-speed networks, Semtech’s multi-lane and multi-rate 10Gbps-100Gbps backplane solutions provide cost-effective, low power, high-performance products to enable next-generation networks.
Enabling High Performance, High-Speed

- Class leading IC solutions for 25G, 100G and 400G applications, including SFP28, QSFP28, CFPx, FRx, DRx SRx and AOCs
- Full portfolio of integrated solutions for all PON applications and complete reference designs
- Semtech’s ClearEdge® CDR with low power, reference-free technology
- Transimpedence amplifiers (TIAs) that exceed the IEEE Stressed Receiver Sensitivity (SRS) specifications
- High performance, low power laser drivers
- Receive Optical Sub-Assembly (ROSA) based on Semtech’s Rchip technology
- Industry’s first single-chip 10G PON transceivers for symmetric and asymmetric applications
- Industry’s first quad CDRs enabling long reach Infiniband® QDR, 40GbE and 100GbE applications
- Full portfolio of integrated solutions to address all SFP+ and XFP modules
- Dual-lane CDRs (Tx/Rx) with integrated DML or EML driver
- Protocol-independent repeaters/redrivers
- Limiting amplifiers (LA) that provide wideband, low noise post-amplification
- SFP+ reference design kits for optical modules to decrease design time

Building the Future Together

As networking requirements continue to evolve, so will Semtech, by working with customers to provide solutions for tomorrow’s networking challenges. One thing that won’t change, however, is Semtech’s commitment to being a reliable supplier and providing innovative approaches that deliver unrivaled performance for the most sophisticated applications.
Technology Leadership for the Future of Optical Communications

TECHNOLOGIES

PAM4

- Chipsets for both 28 and 56 Gbaud applications
- Industry leading linear performance
- Data Center & Wireless markets served

ClearEdge® CDRs

- Market leader in CDRs
- Reference-free operation
- Integrated solutions enable best performance and lowest power

TIAs

Industry leading performance and proven reliability with over 400 million sold

Laser Drivers & Limiting Amplifiers

High-performance integrated solutions for single- and multi-channel applications

ROSAs

Best-in-class sensitivity, based on our patented Rchip technology

MARKETS

56GBd & 28GBd PAM4 Ethernet

Complete solutions for 400G FR4/DR4 and 100G DR1, 200G and 400G as well as AOCs & SRx modules

100G Ethernet

Solutions for QSFP28 and CFPx modules as well as 100G AOCs

25G Ethernet & CPRI

Market leading IC and ROSA solutions for SFP28 modules and AOCs

10G Ethernet & CPRI

- Complete portfolio of module IC and backplane solutions
- Solutions for XFP, SFP+, QSFP+ modules

PON/FTTH

- Industry’s first fully integrated 10G PON solutions
- Highly integrated chipset solutions for EPON & GPON ONU/OLT

16G Fibre Channel

Industry’s first complete integrated IC solution for 16G Fibre Channel
Semtech Solutions for the PAM4 Connected Data Center

Over the past several years, PAM4 has emerged as the leading technology for implementation of a new generation of Data Center and Wireless optical links. Standards such as IEEE 802.3bs and 802.3cd provide a common understanding of link requirements enabling interoperability that will drive the PAM4 communications market to scale, thereby reducing costs. Concurrently, applications such as machine learning and 4k video apply continuous pressure on service providers to provide more (and more!) bandwidth. Semtech is uniquely positioned to meet the challenges of this market by providing its customers a wide range of solutions specifically tailored to individual application needs. Semtech PAM4 chipsets will be released in 2018.

Leveraging its dominant 25 Gbps ClearEdge® CDR and PMD technologies, Semtech’s highly-integrated, 56Gbps PAM4 devices provide an optimal mix of low power, high performance and cost effectiveness required to meet the demands of the multi-mode market. Whether utilized in Active Optical Cables (AOCs) or in standard optical transceivers, Semtech’s easy to design in multi-mode PAM4 solutions, are the ideal electronics solution for multi-mode optical links.
New Products

GN2105B: Low-Power Quad 24-28Gbps ClearEdge CDR with DML Driver
- Fully integrated Quad DML driver and industry-leading ClearEdge® CDR
- Enables <3.5W 100G QSFP28 PSM4 to LR4 designs, when coupled with GN2104S or GN2110B
- DC Coupled DML driver allows for Chip-on-board and Passive DML TOSA applications
- Proprietary DML compensation technology maximizes performance with multiple DML laser vendors

GN2147 / GN2148 / GN2149: Low-Power Dual 24-28Gbps ClearEdge® CDRs with Integrated VCSEL Driver and TIA
- GN2147 offers industry’s higher integrated with Dual CDR + VCSEL Driver + TIA integrated in a compact single die size of 1.7x3.0mm
- GN2148 and GN2149 offers customer flexibility with CDR + VCSEL integration and CDR + TIA integration, respectively in a small die size of 1.2x2.9mm
- Enables low cost, high-performance 25Gbps AOCs and SFP28 SR modules

GN1159: 1.0 to 12.5Gbps LR Transceiver Chip with Digital Diagnostics
- Based on industry proven GN1157/B
- Full suite of flexible Digital Diagnostics modes
- Advanced eye-shaping features
- Up to 92mApp modulation and 120mA bias current

GN2104S / SC: Low-Power Quad ClearEdge® CDR 24-28Gbps
- Low power dissipation (340mW typical)
- Compact footprint ideal for QSFP28 and CFP4 modules

GN2106S: Low-Power Quad ClearEdge® CDR With Integrated SE EML Driver, 24-28Gbps with Integrated Bias T Components
- Fully monolithically integrated quad SE EML Driver and ClearEdge® CDR with integrated Bias T components to allow easier layout
- Industry’s smallest die size of 6mm x 5mm FC-LFBGA package (including passives) and ultra low power of 790mW at 1.5VppSE swing
- Provides reference-free signal conditioning for QSFP28 modules

GN2504: Low-Power Quad ClearEdge® CDR 25-28Gbps Reference-Free Repeater
- Provides reference-free signal conditioning on backplanes and linecards
- Low power dissipation (600mW typical)

GN2108B: Quad 24-28Gbps Transmitter Array for SR4
- Integrated ClearEdge® CDR and VCSEL array driver
- Enable extended reach up to 300m on OM4, and 150m on OM3

GN2110B: Quad 24-28Gbps Receiver Array for SR4
- Integrated TIA array and ClearEdge® CDR offers industry leading performance for both 850nm and 1310nm applications
- 250um channel pitch

GN3358: High Gain 11.3Gbps Limiting APD ROSA
- High output swing with pre-emphasis ideal for non-retimed applications
- Low power dissipation, best-in-class sensitivity
- Available with threshold adjust

GN3270: 28Gbps Limiting PIN ROSA
- Low power dissipation (105mW)
- For 25GbE SFP28 applications

GN7069: 10G ONU TIA
- 10G PON APD TIA with high sensitivity
- 4k and 8k gain modes

GN28L96: 10G PON Symmetric ONU Combo IC
- 10G dual loop Tx, 10G Rx
- BoB and module reference designs
- Low BOM cost
Optical Applications

Semtech products offer a comprehensive selection of optical transceiver ICs and components for all 1-10GbE, CPRI, OC-192, and 100G module form factors.

XFP, SFP+: 10G Retimed

SFP+: 6, 8, 10G

Lowest power, LA Free SFP+

SFP28: 25G SR

SFP28: 25G SR

SFP28: 25G LR DFB/EML

QSFP28/CFPx: 100G SR4

QSFP28/CFPx: 100G PSM4/CWDM4

QSFP28/CFPx: 100G LR4

www.semtech.com
ClearEdge® CDRs

Semtech’s multi-lane signal conditioners based on our reference-free ClearEdge® CDR platform with integrated drivers and TIAs offer the lowest power, smallest footprint solutions for XFP, retimed SFP+, 25G and 100G modules, and AOCs.

**ENABLING NEXT-GENERATION 100G MARKETS**
Semtech 100G ClearEdge® CDR portfolio integrates our proven Quad 24G-28G CDRs with VCSEL, DML or EML drivers for transmit with TIAs for receive, targeting both short reach and long reach modules. Our proven integration and the industry’s lowest power and superior performance simplifies 100G designs and lowers cost.

**ENABLING SFP28 AND 25Gbps AOCs**
The GN2147 dual CDR with integrated VCSEL driver and TIA enables high-performance and low cost SFP28 SR modules and AOCs. The single chip design and advanced transmit compensation enables low cost solutions using a single lens design as well as low bandwidth VCSELs for exceptional BOM savings.

**FEATURE SET FOR DWDM AND TUNABLE APPLICATIONS**
The GN2040 family has a rich feature set to enable optimal performance in DWDM and Tunable applications. The features include slice level adjust, programmable peaking on the receive path input and sampling clock phase adjust.

Transceiver ICs (LD & LA)

High-performance laser drivers and limiting amplifiers for optical communications.

**GN28L95**
Combined 10Gbps limiting post amplifier and 2.5Gbps burst mode laser driver for cost critical 10GEPON and XG-PON asymmetric applications. GN28L95 features robust automatic ER control and integrated APD controller.

**GN28L96**
10G PON combo for next-generation systems. The GN28L96 integrates a 10G burst mode laser driver with dual loop ER control and a 10G limiting amplifier. GN28L96 targets low cost for BoB ONU and module applications.

**GN1157/57B/59/58**
Semtech’s latest, lowest power transceiver IC for SFP+ LR/SR applications with integrated APC and advanced eye shaping features.

TIAs

Wideband, low noise transimpedance amplifiers (TIAs) for your optical communication applications.

Semtech offers a portfolio of fully integrated BiCMOS and pure CMOS transimpedance amplifiers providing wideband, low noise pre-amplification of a current signal from a PIN photodiode or APD.

Semtech’s TIAs offer best-in-class performance in limiting, linear or automatic gain control versions for use in high-performance optical receivers operating from 155Mbps to 28Gbps.

**FEATURES**
- Wideband, low noise
- Limiting, linear and AGC versions
- Fully integrated on-chip de-coupling for low cost and best performance

**APPLICATIONS**
- ITU/IEEE-based transmission systems
- 10G and 100G Ethernet
- SONET/SDH based transmission systems, test equipment and optical modules from OC-3 to OC-192
- 8G and 16G Fibre Channel
- Serial data systems up to 28Gbps
- PON/FTTH systems – BPON, EPON, GPON, 10GEPON and XG-PON
- 6G and 1–12G CPRI modules for wireless front haul
- 100Gbps client side modules

**GN1081, GN1084, GN1085**
1x28Gbps and 4x28Gbps limiting TIA optimized for 100GBASE-LR4 applications.

**GN7069**
10Gbps limiting TIA designed for APD applications such as ROSAs for 10G PON OLT and 10GBASE-ZR transceivers modules.

**GN7050, GN7051, GN7052, GN7053**
Limiting TIA designed specifically for 1G EPON, 1G GPON, 2.5G XG-PON and 10G EPON OLT applications.

**GN1068**
14Gbps multi-rate limiting TIA providing high gain and wideband performance for use in Ethernet and 16G Fibre Channel applications.

**GN1056**
10Gbps linear TIA for high-performance APD applications such as ultra-long haul telecom and submarine applications.

**GN1058**
10Gbps high gain TIA optimized for applications requiring AGC, such as 10GBASE-LRM and DWDM receivers for low OSNR environments.

**GN1090**
Quad 14.5Gbps array receiver for parallel and multi-channel datacom and telecom modules. Advanced receiver design for excellent optical performance and very low power consumption (240mW total for 4 channels). Use with GN1190 Quad VCSEL Driver.

**NT25L55**
2.5Gbps Super TIA for GPON ONU with high sensitivity better than -30dBm over all conditions.
NT25L51
2.5Gbps CMOS TIA for FTTH and Telecom Fiber transceiver applications with automatic gain control enabling over 27dB of dynamic operating range.

NT24L55
Super high sensitivity, high-performance CMOS 1.25Gbps TIA with 35dB of dynamic operating range designed for FTTH applications such as GEPON transceivers and long haul telecom/datacom applications.

NT20R67
Low cost 3.3V to 5.0V CMOS PIN TIA with automatic gain control and more than 43dB dynamic range for Optical Fiber applications up to 200Mbps.

## Laser Drivers and Limiting Amplifiers

High-performance laser drivers and limiting amplifiers for optical communications.

### APPLICATIONS:
- 100Gbps Ethernet
- 6Gbps and 10Gbps CPRI modules for wireless front haul
- 40G QSFP+ modules
- 8G Fibre Channel
- 9.95Gbps OC-192 and 10.70Gbps OC-192 with FEC
- 10.3Gbps Ethernet
- 10.52Gbps Fibre Channel
- 11.1Gbps Ethernet over SONET/SDH
- 11.3Gbps Fibre Channel with Forward Error Correction

### LASER DRIVERS:

**GN1185**
High-performance Quad 25–28Gbps DML driver for active TOSAs targeting 100G applications.

**NT20042**
Low cost 3.3V/5.0V 300 Mbps LED driver for SONET/SDH, ESCON and Fast Ethernet applications over optical fiber.

**NT22L33**
3.3V/5.0V CMOS laser driver for data rates of 125Mbps to 1.25Gbps.

**GN1163**
Very low power laser drivers for DFB/VCSEL applications, RSSI feature for compatibility with our high gain ROSA’s, enabling SFP+ modules without limiting amplifiers.

**GN1190**
Quad VCSEL driver for parallel and multi-channel datacom & telecom modules. Low power consumption, 210mW typical for 4 channels. Use with GN1090 quad TIA.

### LIMITING AMPLIFIERS:

**NT20045**
Low cost 3.0V to 5.5V, 200Mbps limiting amplifier for SONET, SDH, ESCON and Fast Ethernet applications over optical fiber.

**NT24L73**
1.25Gbps CMOS limiting amplifier with CML data outputs and signal status in an MSOP package.

Semtech’s multi-channel signal conditioners enhance the reach and robustness of high-speed serial links by compensating for transmission losses and re-setting the crosstalk and jitter budgets.

**HIGH LEVEL OF INTEGRATION AND SMALL FOOTPRINT**
Semtech’s backplane and linecard signal conditioners are ideal for small form factor modules or dense backplane/linecard applications.

**FULL PORTFOLIO**
Semtech products offer solutions for Ethernet, Infiniband, Fibre Channel and PCI Express. Solutions are available with and without CDR functionality.

**DRIVE LONG BACKPLANES OR CABLES**
A combination of Equalizer, DFE and ClearEdge® CDR technology allows for an optimal solution to drive long, dense backplanes or cables at high speeds.

**LOW POWER**
Semtech’s ClearEdge® CDR products require the lowest power in the industry, a key factor as densities increase.

**RESET THE JITTER AND Crosstalk BUDGETS**
Using CDRs will reset the jitter budget, substantially increasing the robustness of the system and allowing for design flexibility. Using CDRs in multi-channel systems will also reset the crosstalk budget, an increasing concern at higher data rates.

ROSAs

Best-in-class receive optical sub-assemblies (ROSAs) based on patented Rchip technology.

Semtech’s complete line of PIN and APD ROSA products spans 1310nm nanometer (nm) to 1550nm including limiting, linear and automatic gain control (AGC) functionality. Our PIN ROSAs operate at +3.3V±10% and from -40°C to +85°C, with highly accurate RSSI functionality and industry best dynamic range. The ROSA products feature patented Rchip packaged in a fully compliant SC or LC type optical subassembly and are available with optional flex circuits.

Super high gain Rchip ROSAs deliver 35kΩ of gain that eliminates the cost and power of the limiting amplifier for SFP+ applications.

FEATURES:

- Best-in-class stressed receiver sensitivity
- High gain to ensure exceptional crosstalk performance within the module
- Patented Rchip technology to ensure maximum module manufacturing yield
- Super high gain delivers most integrated, lowest power SFP+ solution

APPLICATIONS:

- 10GBASE-SR
- 10GBASE-LR
- 10GBASE-ER
- 10GBASE-LRM
- OC-192 SR-1
- OC-192 IR-2
- 10G EPON
- 80km
- DWDM
- 8GFC & 10GFC
- 25G Ethernet

GN3289
56Gb/s linear AGC ROSA for up to 100Gbps Ethernet operation using PAM4 modulation. Optimized for low group delay variation, high linearity, and designed to enable cost effective 100Gbps modules.

GN3270
A limiting 25Gbps PIN ROSA in a TO-46 style coaxial package, with excellent sensitivity performance coupled with low power consumption.

GN3358
11.3Gbps APD ROSA with high gain limiting TIA with pre-emphasis output designed to eliminate the need for the post amplifier.

GN3357
11.3Gbps APD ROSA with high gain linear AGC TIA for both 80km limiting and DWDM applications requiring excellent OSNR performance.

GN3257
10/40km linear AGC ROSA offering excellent performance in low-OSNR environments, coupled with low power consumption.

GN3268
10/40km XMD compatible low power (94mW) limiting ROSA.

Optical Module Reference Design Kit

Improve the performance and time to market of your SFP+ design with Semtech Optical Module Reference Design Kits.

**FAST TIME-TO-MARKET**
Semtech’s reference design kits offer training through schematics, layout files and a design guide as well as prompt support from our experienced applications engineers, reducing both design costs and time to market. This type of system is currently executed in the FTTx market, as the ability to reuse the 10G symmetric SFP+ design to address the 10G asymmetric market is incorporated.

**BROAD RANGE OF REFERENCE DESIGNS AVAILABLE**
Reference design kits are offered to cover a wide variety of SFP+ applications, including symmetrical and asymmetrical PON, and 10GbE SR and LR applications.
