www.semtech.com
Semtech designs the industry's most innovative optical, analog and mixed-signal semiconductor solutions to serve the rising global demand for high-speed data transmission products.

Semtech is an active contributor to networking standards development and has shipped over a billion optical ICs. This combination of real-world experience and industry leadership enables us to deliver best-in-class solutions for our customers’ designs.

Semtech offers one of the industry’s most comprehensive portfolios of optical transceiver IC products ranging from 100Mbps to over 100Gbps, supporting key industry standards such as Fibre Channel, InfiniBand®, Ethernet, CPRI, PON, OTN, SONET, and PCI Express®. Semtech is also investing in leading-edge technologies to enable communication systems at 400Gbps and beyond.

For our optical component and module customers, this highly differentiated set of products provides a unique roadmap that improves performance and reliability, while simplifying design, lowering costs and speeding time-to-market.

For systems designers and manufacturers working on the next generation of high-speed networks, Semtech’s multi-lane and multi-rate 10Gbps-100Gbps backplane solutions provide cost-effective, low power, high-performance products to enable next-generation networks.
Semtech Solutions

Enabling High Performance, High-Speed

- Class leading IC solutions for 10G, 25G, 100G and 400G applications, including SFP28, QSFP28, CFPx, FRx, DRx SRx and AOCs
- Full portfolio of integrated solutions for all PON applications and complete reference designs
- Semtech’s ClearEdge® CDR with low power, reference-free technology
- Transimpedence Amplifiers (TIAs) that exceed the IEEE Stressed Receiver Sensitivity (SRS) specifications
- High performance, low power laser drivers
- Receive Optical Sub-Assembly (ROSA) based on Semtech’s Rchip technology
- Industry’s first single-chip 10G PON OLT transceivers for XGSPON and 10GEPON applications
- Industry’s first quad CDRs enabling long reach Infiniband® QDR, 40GbE and 100GbE applications
- Full portfolio of integrated solutions to address all SFP+ and XFP modules
- Dual-lane CDRs (Tx / Rx) with integrated DML or EML driver
- Protocol-independent repeaters / redrivers
- Limiting Amplifiers (LA) that provide wideband, low noise post-amplification
- SFP+ reference design kits for optical modules to decrease design time

Building the Future Together

As networking requirements continue to evolve, so will Semtech, by working with customers to provide solutions for tomorrow’s networking challenges. One thing that won’t change, however, is Semtech’s commitment to being a reliable supplier and providing innovative approaches that deliver unrivaled performance for the most sophisticated applications.
Technology Leadership for the Future of Optical Communications

TECHNOLOGIES

PAM4
• Chipsets for both 28 and 56 Gbaud applications
• Industry leading linear performance
• Data Center and Wireless markets served

ClearEdge® CDRs
• Market leader in CDRs
• Reference-free operation
• Integrated solutions enable best performance and lowest power

TIAs
Industry leading performance and proven reliability with over 400 million sold

Laser Drivers & Limiting Amplifiers
High-performance integrated solutions for single- and multi-channel applications

ROSAs
Best-in-class sensitivity, based on Semtech’s patented Rchip technology

MARKETS

56GBd & 28GBd PAM4 Ethernet
Solutions for 50G, 100G, 200G and 400G as well as AOCs and SRx modules

100G Ethernet
Solutions for QSFP28 and CFPx modules as well as 100G AOCs

25G Ethernet & eCPRI
Market leading IC and ROSA solutions for SFP28 modules and AOCs

10G Ethernet & CPRI
• Complete portfolio of module IC and backplane solutions
• Solutions for XFP, SFP+, QSFP+ modules

PON / FTTH
• Industry’s first fully integrated 10G PON OLT solutions
• Highly integrated chipset solutions for 10G PON ONU

16G Fibre Channel
Industry’s first complete integrated IC solution for 16G Fibre Channel
PAM4 Connected Data Center

Over the past several years, PAM4 has emerged as the leading technology for implementation of a new generation of Data Center and Wireless optical links.

Standards such as IEEE 802.3bs and 802.3cd provide a common understanding of link requirements enabling interoperability that will drive the PAM4 communications market to scale, thereby reducing costs. Concurrently, applications such as machine learning and 4K video apply continuous pressure on service providers to provide more, and more bandwidth. Semtech is uniquely positioned to meet the challenges of this market by providing its customers a wide range of solutions specifically tailored to individual application needs.

Comprised of Semtech’s market-leading, linear, Physical Media Dependent (PMD) FiberEdge™ products and advanced physical layer devices, our chipsets for single mode applications set the standard for data center applications. Semtech delivers 100Gbps, single lambda solutions that exceed stringent IEEE, OIF and MSA standards with world class electronics specifically designed and orchestrated for optimal performance.

Leveraging its dominant 25 Gbps ClearEdge® CDR and PMD technologies, Semtech’s highly-integrated, 56Gbps PAM4 devices provide an optimal mix of low power, high performance and cost effectiveness required to meet the demands of the multi-mode market. Whether utilized in Active Optical Cables (AOCs) or in standard optical transceivers, Semtech’s easy to design in multi-mode PAM4 solutions, are the ideal electronics solution for multi-mode optical links.
New Products

**GN2146**: Low-Power Bi-Directional 24-28Gbps ClearEdge® CDR with EML / MZM Driver
- Fully integrated EML / MZM driver and industry-leading ClearEdge® CDR
- Enables <1.5W SFP28 20km DWDM or Tunable modules
- Fully monolithic integrated EML / MZM Driver and ClearEdge® CDR with integrated Bias T components to allow easier layout
- Industry's smallest die size of 5mm x 4mm FC-LFBGA package (including passives) and ultra low power 550mW at 2VppSE (4VppD) swing

**GN2142**: Low-Power Bi-Directional 24-28Gbps ClearEdge® CDR with DML Driver
- Fully integrated DML driver and industry-leading ClearEdge® CDR
- Enables <1W SFP28 300m / 10km modules
- Proprietary DML compensation technology maximizes performance with multiple DML laser vendors including low bandwidth lasers

**GN2105B**: Low-Power Quad 24-28Gbps ClearEdge® CDR with DML Driver
- Fully integrated Quad DML driver and industry-leading ClearEdge® CDR
- Enables <3.5W 100G QSFP28 PSM4 to LR4 designs, when coupled with GN2104S or GN2110B
- DC Coupled DML driver allows for Chip-on-board and Passive DML TOSA applications
- Proprietary DML compensation technology maximizes performance with multiple DML laser vendors

**GN2147 / GN2148 / GN2149**: Low-Power Dual 24-28Gbps ClearEdge® CDRs with Integrated VCSEL Driver and TIA
- GN2147 offers industry’s higher integrated with Dual CDR + VCSEL Driver + TIA integrated in a compact single die size of 1.7 x 3.0mm
- GN2148 and GN2149 offers customer flexibility with CDR + VCSEL integration and CDR + TIA integration, respectively in a small die size of 1.2 x 2.9mm
- Enables low cost, high-performance 25Gbps AOCs and SFP28 SR modules

**GN2106S**: Low-Power Quad ClearEdge® CDR With Integrated SE EML Driver, 24-28Gbps with Integrated Bias T Components
- Fully monolithic integrated quad SE EML Driver and ClearEdge® CDR with integrated Bias T components to allow easier layout
- Industry’s smallest die size of 6mm x 5mm FC-LFBGA package (including passives) and ultra low power of 790mW at 1.5VppSE swing
- Provides reference-free signal conditioning for QSFP28 modules

**GN2104S / SC**: Low-Power Quad ClearEdge® CDR 24-28Gbps
- Low power dissipation (340mW typical)
- Compact footprint ideal for QSFP28 and CFP4 modules

**GN2108S**: Quad 24-28Gbps Transmitter Array for SR4
- Integrated ClearEdge® CDR and VCSEL array driver
- Small die size of 3mm x 2mm
- Enable extended reach up to 300m on OM4, and 150m on OM3

**GN2109S / 10S**: Quad 24-28Gbps Receiver Array for SR4
- Integrated TIA array and ClearEdge® CDR offers industry leading performance for both 850nm and 1310nm applications
- Small die size of 3mm x 2mm
- 250um channel pitch

**GN7154 / 7056**: 10GEPON OLT Chipset
- 10G EML / CDR with dual output burst mode limiting amplifier
- GN7056 high sensitivity 10GEPON OLT TIA

**GN25L99**: GPON OLT Combo IC
- 2.5G dual loop Tx, 1.25G burst mode Rx
- Highly integrated, low BOM cost and compact size
Semtech offers a comprehensive selection of optical transceiver ICs and components for all 1-10GbE, CPRI, OC-192, and 100G module form factors.
**ClearEdge® CDRs**

Semtech’s multi-lane signal conditioners, based on our reference-free ClearEdge® CDR platform with integrated drivers and TIAs, offer the lowest power, smallest footprint solutions for XFP, retimed SFP+, 25G and 100G modules, in addition to AOCs.

**ENABLING NEXT-GENERATION 100G MARKETS**

Semtech’s 100G ClearEdge® CDR portfolio integrates our proven Quad 24G-28G CDRs with VCSEL, DML or EML drivers for transmit with TIAs for receive, targeting both short reach and long reach modules. Our proven integration and the industry’s lowest power and superior performance simplifies 100G designs and lowers cost.

**ENABLING SFP28 AND 25GBPS AOCs**

The GN2147 dual CDR with integrated VCSEL driver and TIA enables high-performance and low cost SFP28 SR modules and AOCs. The single chip design and advanced transmit compensation provides for low cost solutions using a single lens design as well as low bandwidth VCSELs for exceptional BOM savings.

**FEATURE SET FOR DWDM AND TUNABLE APPLICATIONS**

The GN2040 family has a rich feature set to enable optimal performance in DWDM and Tunable applications. The features include slice level adjust, programmable peaking on the receive path input and sampling clock phase adjust.

Transceiver ICs (LD & LA)

High-performance laser drivers and limiting amplifiers for optical communications.

**GN28L95**
Combined 10Gbps limiting post amplifier and 2.5Gbps burst mode laser driver for cost critical 10GEPON and XG-PON asymmetric applications. GN28L95 features robust automatic ER control and integrated APD controller.

**GN28L96**
10G PON combo for next-generation systems. The GN28L96 integrates a 10G burst mode laser driver with dual loop ER control and a 10G limiting amplifier. GN28L96 targets low cost for BoB ONU and module applications.

**GN1157 / 57B / 59 / 58 / 96**
Semtech’s latest, lowest power transceiver IC for SFP+ LR / SR applications with integrated APC and advanced eye shaping features.

TIAs

Wideband, low noise transimpedance amplifiers (TIAs) for optical communication applications.

Semtech offers a portfolio of fully integrated BiCMOS and pure CMOS transimpedance amplifiers providing wideband, low noise pre-amplification of a current signal from a PIN photodiode or APD.

Semtech’s TIAs offer best-in-class performance in limiting, linear or automatic gain control versions for use in high-performance optical receivers operating from 155Mbps to 100Gbps.

FEATURES
• Wideband, low noise
• Limiting, linear and AGC versions
• Fully integrated on-chip de-coupling for low cost and best performance

APPLICATIONS
• ITU / IEEE-based transmission systems
• 10G and 100G Ethernet
• SONET / SDH based transmission systems, test equipment and optical modules from OC-3 to OC-192
• 8G and 16G Fibre Channel
• Serial data systems up to 28Gbps
• PON / FTTH systems – EPON, GPON, 10GE PON, XG-PON and XGS-PON
• 6G and 1–12G CPRI modules for wireless front haul
• 100Gbps client side modules

GN1081, GN1084, GN1085, GN1088
1 x 28Gbps and 4 x 28Gbps limiting TIA optimized for 100GBASE-LR4 applications.

GN7069
10Gbps limiting TIA designed for APD applications such as 5GHz WiFi immune 10G PON ONU’s.

GN7055, GN7056
Limiting TIA designed specifically for XGS-PON and 10G EPON OLT applications.

GN1068, GN1069
12.5-14Gbps multi-rate limiting TIA providing high gain and wideband performance for use in Ethernet and 16G Fibre Channel applications.

GN1056
10Gbps linear TIA for high-performance APD applications such as ultra-long haul telecom and submarine applications.

GN1058
10Gbps high gain TIA optimized for applications requiring AGC, such as 10GBASE-LRM and DWDM receivers for low OSNR environments.

GN1090
Quad 14.5Gbps array receiver for parallel and multi-channel datacom and telecom modules. Advanced receiver design for excellent optical performance and very low power consumption (240mW total for 4 channels). Use with GN1190 Quad VCSEL Driver.

GN25L54
2.5Gbps Super TIA for GPON ONU with low cost build.
**NT24L55**
Ultra high sensitivity, high-performance CMOS 1.25Gbps TIA with 35dB of dynamic operating range designed for FTTH applications such as GEPON transceivers and long haul telecom / datacom applications.

**NT24L50**
1.25Gbps high sensitivity TIA with automatic gain control for FTTH and Datacom Fiber transceiver applications.

**NT23L50**
622Mbps high sensitivity TIA for FTTH and Telecom Fiber transceiver applications.

**NT20R67**
Low cost 3.3V to 5.0V CMOS PIN TIA with automatic gain control and more than 43dB dynamic range for Optical Fiber applications up to 200Mbps.

Laser Drivers & Limiting Amplifiers

High-performance laser drivers and limiting amplifiers for optical communications.

APPLICATIONS
- 100Gbps Ethernet
- 6Gbps and 10Gbps CPRI modules for wireless front haul
- 40G QSFP+ modules
- 8G Fibre Channel
- 9.95Gbps OC-192 and 10.70Gbps OC-192 with FEC
- 10.3Gbps Ethernet
- 10.52Gbps Fibre Channel
- 11.1Gbps Ethernet over SONET / SDH
- 11.3Gbps Fibre Channel with Forward Error Correction

LIMITING AMPLIFIERS

NT20045
Low cost 3.0V to 5.5V, 200Mbps limiting amplifier for SONET, SDH, ESCON and Fast Ethernet applications over optical fiber.

NT24L73
1.25Gbps CMOS limiting amplifier with CML data outputs and signal status in an MSOP package.

LASER DRIVERS

GN1185
High-performance Quad 25–28Gbps DML driver for active TOSAs targeting 100G applications.

NT20042
Low cost 3.3V / 5.0V 300 Mbps LED driver for SONET / SDH, ESCON and Fast Ethernet applications over optical fiber.

NT22L33
3.3V / 5.0V CMOS laser driver for data rates of 125Mbps to 1.25Gbps.

GN1163
Very low power laser drivers for DFB / VCSEL applications, RSSI feature for compatibility with our high gain ROSA's, enabling SFP+ modules without limiting amplifiers.

GN1190
Quad VCSEL driver for parallel and multi-channel datacom and telecom modules. Low power consumption, 210mW typical for 4 channels. Use with GN1090 quad TIA.

Semtech's multi-channel signal conditioners enhance the reach and robustness of high-speed serial links by compensating for transmission losses and resetting crosstalk and jitter budgets.

**HIGH LEVEL OF INTEGRATION AND SMALL FOOTPRINT**
Semtech’s backplane and linecard signal conditioners are ideal for small form factor modules or dense backplane / linecard applications.

**FULL PORTFOLIO**
Semtech products offer solutions for Ethernet, Infiniband, Fibre Channel and PCI Express. Solutions are available with and without CDR functionality.

**DRIVE LONG BACKPLANES OR CABLES**
A combination of Equalizer, DFE and ClearEdge® CDR technology allows for an optimal solution to drive long, dense backplanes or cables at high speeds.

**LOW POWER**
Semtech’s ClearEdge® CDR products require the lowest power in the industry, a key factor as densities increase.

Best-in-class receive optical sub-assemblies (ROSAs) based on patented Rchip technology.

Semtech’s complete line of PIN and APD ROSA products spans 1310nm nanometer (nm) to 1550nm including limiting, linear and automatic gain control (AGC) functionality. Our PIN ROSAs operate at +3.3V±10% and from -40°C to +85°C, with highly accurate RSSI functionality and industry best dynamic range. The ROSA products feature patented Rchip technology packaged in a fully compliant SC or LC type optical subassembly and are available with optional flex circuits.

Super high gain Rchip ROSAs deliver 35kΩ of gain that eliminates the cost and power of the limiting amplifier for SFP+ applications.

**FEATURES**

- Best-in-class stressed receiver sensitivity
- High gain to ensure exceptional crosstalk performance within the module
- Patented Rchip technology to ensure maximum module manufacturing yield
- Super high gain delivers most integrated, lowest power SFP+ solution

**APPLICATIONS**

- 10GBASE-SR
- 10GBASE-LR
- 10GBASE-ER
- 10GBASE-LRM
- OC-192 SR-1
- OC-192 IR-2
- 10G EPON
- Low OSNR DWDM
- 8GFC and 10GFC
- 25G Ethernet
- 28GBd and 56GBd PAM4

**GN3289**

56GBd linear AGC ROSA for up to 100Gbps Ethernet operation using PAM4 modulation. Optimized for low group delay variation, high linearity, and designed to enable cost effective 100Gbps modules.

**GN3270**

A limiting 25Gbps PIN ROSA in a TO-46 style co-axial package, with excellent sensitivity performance coupled with low power consumption.

**GN3358**

11.3Gbps APD ROSA with high gain limiting TIA with pre-emphasis output designed to eliminate the need for the post amplifier.

**GN3357**

11.3Gbps APD ROSA with high gain linear AGC TIA for both 80km limiting and DWDM applications requiring excellent OSNR performance.

**GN3257**

10 / 40km linear AGC ROSA offering excellent performance in low-OSNR environments, coupled with low power consumption.

**GN3268**

10 / 40km XMD compatible low power (94mW) limiting ROSA.

## Optical Module Reference Design Kits

Improve the performance and time to market of your SFP+ design with Semtech Optical Module Reference Design Kits.

### FAST TIME-TO-MARKET

Semtech’s Reference Design Kits offer training through schematics, layout files and a design guide, as well as prompt support from our experienced applications engineers, reducing both design costs and time to market. This type of system is currently executed in the FTTx market, as the ability to reuse the 10G symmetric SFP+ design to address the 10G asymmetric market is incorporated.

### BROAD RANGE OF REFERENCE DESIGNS AVAILABLE

Reference Design Kits are offered to cover a wide variety of SFP+ applications, including symmetrical and asymmetrical PON, and 10GbE SR and LR applications. For Ethernet SFP+, designs are available for both the traditional architecture (including a LA in the receive chain), as well as a new LA-free architecture enabled by Semtech’s High Gain ROSA portfolio.
